

# Manhattan Scientifics Prepares for Future: Considers Acquisition and Path to Uplisting

July 9, 2019

NEW YORK--Manhattan Scientifics, Inc. today issued an update on the status of the company and its future plans.

After successfully spinning-out and taking public its cancer diagnostic technology (IBX) and exclusively licensing its other metals technology, Manhattan Scientifics will enter its third phase of activity – to acquire a substantial technology company and to uplist MHTX to a national securities exchange such as the Nasdaq Capital Market.

We remain optimistic about prospects for commercialization of our two nanotechnology developments and we are actively engaged in early discussions with prospective companies that wish to go public via the process of merging with us.

## ***About Manhattan Scientifics***

Manhattan Scientifics Inc. ([www.mhtx.com](http://www.mhtx.com)) is focused on commercialization of disruptive technologies in the nano medicine space.

## ***Forward-looking statement***

This press release contains forward-looking statements.
